## Head of Seedcare and Biologicals for Syngenta Canada

Scott Ewert is Head of Seedcare and Biologicals for Syngenta Canada where he leads a team in driving innovation and performance to help growers protect their seed investment against a broad range of diseases and pests, giving crops the best possible start.

Scott's 25+ year career with Syngenta and its legacy companies has taken him from Manitoba to Saskatchewan, before settling in Ontario.

Under Scott's direction, Syngenta has become a leader in seed treatment in Canada. Syngenta Seedcare™ products are backed by the technical expertise of The Canadian Seedcare Institute, where Scott and his team advance safety and handling practices, including the introduction of closed application systems for seed treaters using bulk product delivery.

In 2024, Scott also assumed responsibility for Syngenta's Canadian Biologicals business, focusing on how biological solutions can complement large-acre crop production and communicating these benefits to growers and retailers.

Beyond Syngenta, Scott has been active in the Canadian Seed Trade Association and Seeds Canada, serving on committees, chairing the Seed Applied Technologies and Stakeholder Relations Committees, and sitting on the board of directors (2019-2021).

Scott holds a Plant Science degree from the University of Manitoba.

Syngenta Canada is an agribusiness whose ambition is to be the most collaborative and trusted team in agriculture, providing leading seeds and crop protection innovations to enhance the prosperity of farmers and ensure the continued sustainability of agriculture.
