

# Scott Ewert

## Head of Seedcare for Syngenta Canada

Scott Ewert is Head of Seedcare for Syngenta Canada, leading a team looking to deliver constant innovation and performance improvement. Under Scott's direction, Syngenta has become a leader in seed treatment in Canada, introducing products that help growers protect their seed investment against a broad range of diseases and pests, giving crops the best possible start. This offer is backed by the technical expertise offered at The Canadian Seedcare Institute, where Scott and his team are continually looking at opportunities to improve on the safety and handling of Syngenta Seedcare products, including the introduction of closed application systems for seed treaters using bulk product delivery.

He holds a Plant Science degree from the University of Manitoba and has extended his leadership reach to the Canadian Seed Trade Association, where he has been an active committee member for ten years, chairing the Seed Applied Technologies and Stakeholder Relations Committees prior to the Seeds Canada amalgamation.

Syngenta Canada is an agribusiness whose ambition is to be the most collaborative and trusted team in agriculture, providing leading seeds and crop protection innovations to enhance the prosperity of farmers and ensure the continued sustainability of agriculture.
