

Dr. Ravi Ramachandran

Head of Research and Development for Crop Protection for Syngenta Canada

Dr. Ravi Ramachandran is the Head of Research and Development for Crop Protection at Syngenta Canada where he leads a talented team of scientists across Canada who are working to improve the way crops are grown and protected.

In his nearly 20 years as a Syngenta scientist, Ravi has held numerous techno-commercial leadership roles in the United States and Canada, applying his extensive background in chemistry to develop innovative seed treatment and crop protection technologies.

Most recently he led the establishment of The Seedcare Institute for North America, a state-of-the-art facility in Stanton, Minnesota, that focuses on seed treatment technology and application services that enables growers to safely and effectively protect their crop.

Ravi holds a bachelor of science in Physical Sciences and a master of science in Chemistry from Bangalore University in India, as well as a Doctorate in Organometallic Chemistry from Western University in London, Ontario.

Syngenta Canada is an agribusiness whose ambition is to be the most collaborative and trusted team in agriculture, providing leading seeds and crop protection innovations to enhance the prosperity of farmers and ensure the continued sustainability of agriculture.
