

A NEW DIMENSION OF INSECT CONTROL.

Give your field something different.

Agrisure Duracade® is the newest rootworm trait with a unique mode of action. Agrisure Duracade is available in two trait stacks, each with dual modes of corn rootworm control and integrated E-Z Refuge® in a bag.

When you choose Agrisure Duracade, you choose the ultimate option for insect control, simplicity and choice:

- Delivers a unique mode of action to help control corn rootworm differently than any other trait on the market.
- Combines two modes of action for control of corn rootworm and corn borer.
- Helps prevent root damage and silk clipping to preserve yield and harvest potential.
- Trait stacks offer above- and below-ground insect control.

	Description	E-Z Refuge®	Agrisure Viptera 3220 E-Z Refuge®	Glyphosate tolerant/ Roundup Ready®	LibertyLink®
Agrisure Duracade® 5222 E-Z Refuge®	Offers premium above- and below-ground control of 16 damaging insects, including corn rootworm.	✓	✓	✓	✓
Agrisure Duracade® 5122 E-Z Refuge®	Delivers effective season-long control of several above- and below-ground insects. The trait combines two powerful modes of action for control of corn rootworm and corn borer.	✓		✓	✓

Rev. September 2020

Corn rootworm control

Agrisure Duracade expresses a protein with a unique binding site in the gut of the corn rootworm, reducing pressure on the corn seedling and helping hybrids develop a stronger, more robust root system that supplies your plants with optimal water and nutrient uptake. Stronger roots lead to healthier plants that stand all season long, helping to realize the crop's genetic yield potential and increase profit opportunities.

Make the switch and experience the Agrisure Duracade difference for yourself. Visit Syngenta.ca/Agrisure-Duracade.

Performance evaluations are based on internal trials, field observations and/or public information. Data from multiple locations and years should be consulted whenever possible. Individual results may vary depending on local growing, soil and weather conditions.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, post-emergent weed control of Liberty® herbicides for optimum yield and excellent weed control. Consult bag tags for E-Z Refuge® product herbicide options. Only those labeled EZ1 may be sprayed with glufosinate ammonium-based herbicides, including Liberty® herbicide. LibertyLink®, Liberty® and the Water Droplet logo are registered trademarks of BASF.
